A perspective view of the device 8 from a side-top angle. The device has a rectangular base plate 7. On top of the base plate, there are several components: a central rectangular area 31, a smaller rectangular area 32, and a long narrow strip 34. A dashed line 38 indicates a hidden internal feature. A small rectangular component 47a is located near the center. A curved arrow 48a points to the right edge of the device, and another curved arrow 48b points to the bottom edge. A dashed line 49 indicates a hidden internal feature. A small rectangular component 53 is located at the bottom left corner. A dashed line 54 indicates a hidden internal feature. A dashed line 55 indicates a hidden internal feature. A dashed line 56 indicates a hidden internal feature. A dashed line 57 indicates a hidden internal feature. A dashed line 58 indicates a hidden internal feature. A dashed line 59 indicates a hidden internal feature. A dashed line 60 indicates a hidden internal feature. A dashed line 61 indicates a hidden internal feature. A dashed line 62 indicates a hidden internal feature. A dashed line 63 indicates a hidden internal feature. A dashed line 64 indicates a hidden internal feature. A dashed line 65 indicates a hidden internal feature. A dashed line 66 indicates a hidden internal feature. A dashed line 67 indicates a hidden internal feature. A dashed line 68 indicates a hidden internal feature. A dashed line 69 indicates a hidden internal feature. A dashed line 70 indicates a hidden internal feature. A dashed line 71 indicates a hidden internal feature. A dashed line 72 indicates a hidden internal feature. A dashed line 73 indicates a hidden internal feature. A dashed line 74 indicates a hidden internal feature. A dashed line 75 indicates a hidden internal feature. A dashed line 76 indicates a hidden internal feature. A dashed line 77 indicates a hidden internal feature. A dashed line 78 indicates a hidden internal feature. A dashed line 79 indicates a hidden internal feature. A dashed line 80 indicates a hidden internal feature. A dashed line 81 indicates a hidden internal feature. A dashed line 82 indicates a hidden internal feature. A dashed line 83 indicates a hidden internal feature. A dashed line 84 indicates a hidden internal feature. A dashed line 85 indicates a hidden internal feature. A dashed line 86 indicates a hidden internal feature. A dashed line 87 indicates a hidden internal feature. A dashed line 88 indicates a hidden internal feature. A dashed line 89 indicates a hidden internal feature. A dashed line 90 indicates a hidden internal feature. A dashed line 91 indicates a hidden internal feature. A dashed line 92 indicates a hidden internal feature. A dashed line 93 indicates a hidden internal feature. A dashed line 94 indicates a hidden internal feature. A dashed line 95 indicates a hidden internal feature. A dashed line 96 indicates a hidden internal feature. A dashed line 97 indicates a hidden internal feature. A dashed line 98 indicates a hidden internal feature. A dashed line 99 indicates a hidden internal feature.
